

## Work seat Assist V-matic

This version of the Assist work chair has the unique V-MATIC seat mechanism, which provides free movement in all directions. ASSIST V-MATIC is thus an ergonomic work chair which, through active sitting, stimulates the back and neck and prevents strain injuries. The chair has a comfortable PU seat for easy cleaning, as well as stepless adjustment of the working height. For the highest version of ASSIST V-MATIC we recommend the use of sliding feet.

Seat height low: 420 – 550 mm  
Seat height high: 560 – 820 mm

Below you will find additional equipment.
