

Tabletop ESD mat

24 mm thick table tops for use in ESD environments.

The top of the tabletop is gray linoleum (U12188MP), the underside has a barrier layer and the top is edged with beech edging. Under the table top there is an ESD ground terminal, GBP ground connection on the right front of the table top.

The linoleum surface gives a table top with a slightly softer expression and has high impact resistance. This table top fits all of our workshop table stands, with the exception of the heavy leg brackets.
