

ErgoSingel TL18, 495x495 mm

The ErgoSingel TL18 workstation is a stand that can be raised and lowered. Aluminum column TL18 with cable out in outer profile with strong, galvanized top and floor plate.

Plate dimensions: 495 x 495 x 8 mm. Simple height adjustment with table control between 710 -1210 mm, excluding table top. The pillar station should be bolted to the floor.

It can also be used standing loosely on the floor, if you make sure that there is no tipping risk. Supplied complete with large top and bottom plate, control unit and table control for electrical connection.

The stand is prepared for an extension frame, which is ordered separately. Tabletop and add-on accessories are ordered separately. Width of superstructure, to be used, is 670 mm. The station is adapted for a depth of 600 mm, when a superstructure is used.
