Tilting table ErgoTilt 2-stands 1200×1205 RAL 9006

A complete motor-driven, CE-marked tilting table with two-column stand, the work surface can be tilted up to 75º.

The working surface can be extended by 315 mm by moving the cutting edge. The edge of the race can function as support or as a shelf for tools, but the goods on the table MUST be screwed into the table frame or into the table top.

Regulation of working height and angulation takes place with hand controls located on the right or left side of the stand. The angling table is intended as an ergonomic and rational assembly table. All the steel parts of the table stand are fully welded and the table is very stable.

The table is delivered fully assembled and functionally tested, delivered on a EUR pallet. Including assembled plywood table top. Wheel set is available as an accessory.
