

## Aroma-free cold degreaser

Aromatic-free, low-fat degreaser suitable for cleaning steel, iron, stainless steel, aluminium, brass and copper.

Degreasing agent with a weak fragrance is an effective washing liquid for use in the workshop washers Microclean, Masterclean and Maxiclean. The agent removes oil, grease, soot, wax, graphite, tar and asphalt.

Dissolved greasy impurities can be blown away with compressed air or wiped away with a cloth or similar.

Degreaser leaves a rust-protective film and is stored cool and away from sources of ignition.
